## ONEBLOOD

LMSNA thanks everyone who donated blood in February at the OneBlood drive! It was a success and they reported their goal—36 lives were saved!

Donated blood is typically transfused into a recipient within 48 hours, so these donations really make a difference.

\*They will be returning to campus in May so if you would like to donate again or didn't get the chance, the opportunity will soon arrive.

## PTSD IN THE COMMUNITY

Several students with dr. Green's mental health class (cohort 28) teamed up with picnic project to educated the community PTSD among individuals living/growing up in poverty. It was a huge success and drew a lot of attention with adolescents. There were games, prizes and educational materials all created by our students.

\*Future opportunities will be announced!

## COHORT 28 RESEARCH PRESENTATIONS

Cohort 28 did a tremendous job presenting their posters to faculty and students at the end of March. The classrooms and library were filled with very interesting and detailed presentations.

They all worked so hard with finals right around the corner and all while having overnight clinicals~
